

CARGO MONITORING EQUIPMENTS

GUARD LEVEL : FLOAT GAUGE AND ALARM SENSORS

- All Stainless Construction
- Full depth gauging to 20Mtr
- Intrinsically Safe
- Independent "high and overflow" alarms
- Ullage tape

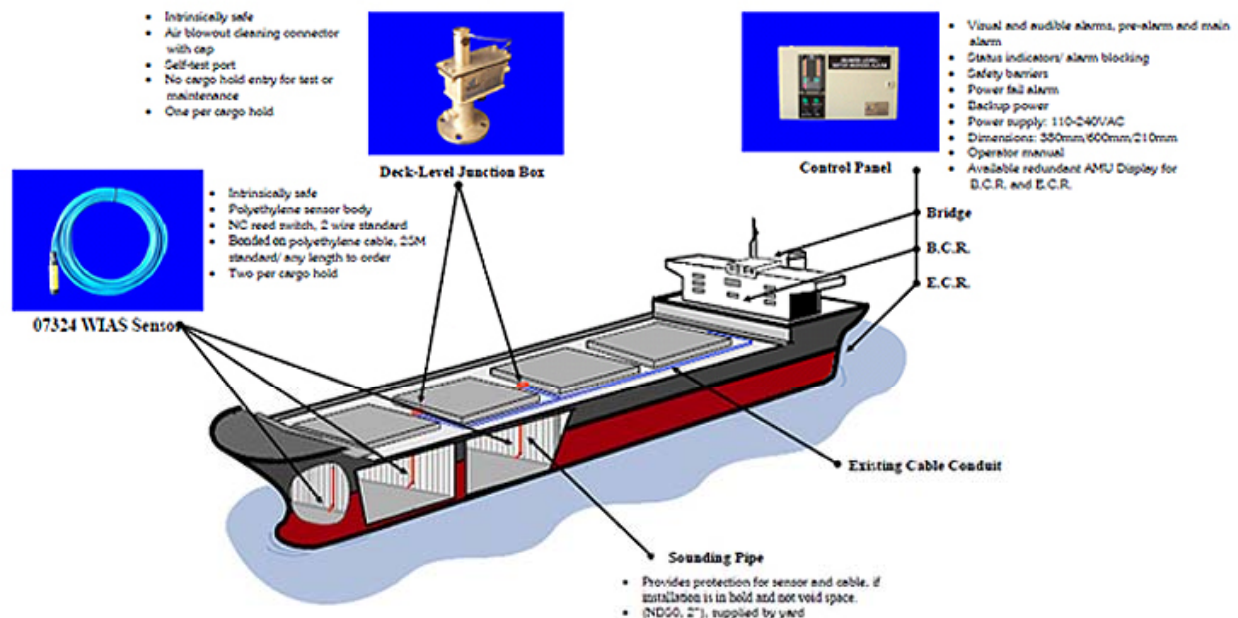

- ### CARGO RADAR
- MICROWAVE level gauge
 - Full depth tank gauging
 - All stainless steel construction

WATER INGRESS ALARM SYSTEMS

Simple installation

- Suitable for all bulk cargoes
- Testing (in-situ), installation and maintenance of sensor can be done from deck level at any time, with empty or full cargo hold. **NO CLIMBING INTO CARGO HOLD.**
- Pre and the main-alarm sensor require no calibration
- **Rugged, intrinsically safe SS deck junction box** with built-in convenient cleaning port and test port
- Simple sounding pipe (ND50, 2") provides mechanical protection of the sensor and sensor cable (DE 46 Section 2.3.5) protection. Pipe is easily blown clean (if needed).
- No sounding pipe necessary if void space is available for installation.
- High quality at competitive price
- **Class approved**
