

IMES, Germany : Engine Performance Indicator Equipment

Intelligent Solutions in Engine Management

EPM-XP

Application on 2- and 4 stroke engines

Salient Features :

One of the 'simplest' yet Most RELIABLE equipment - to know how your engine is performing!

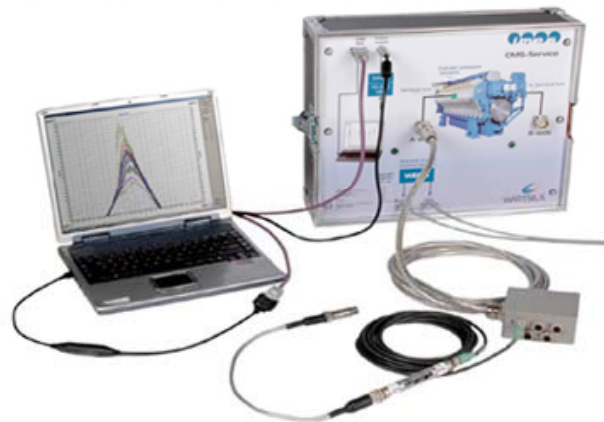

No need to install any sensors - just connect it to individual indicator cock one by one, download results into PC and with the help of specially developed software, analyse the results - it is THAT SIMPLE!

- One measuring device for 2- and 4 stroke engines
- Pressure signal is temperature compensated - high accuracy
- Each unit will be delivered with calibration protocol
- Automatic Pcomp calculation on two stroke application
- Automatic IPOWER calculation on two stroke application as option
- Save measured data to ASCII format
- Battery charging from PC via USB port
- Automatic self test function for offset check
- Checking accuracy at pressure calibrator acc. ISO 9001

Advantages :

- . Simplest equipment of its kind available in the market today
- . Reliable and precise combustion performance engine
- . Compact packing; Lightweight
- . Results can be sent by email attachment
- . Unit battery recharging from PC via USB port

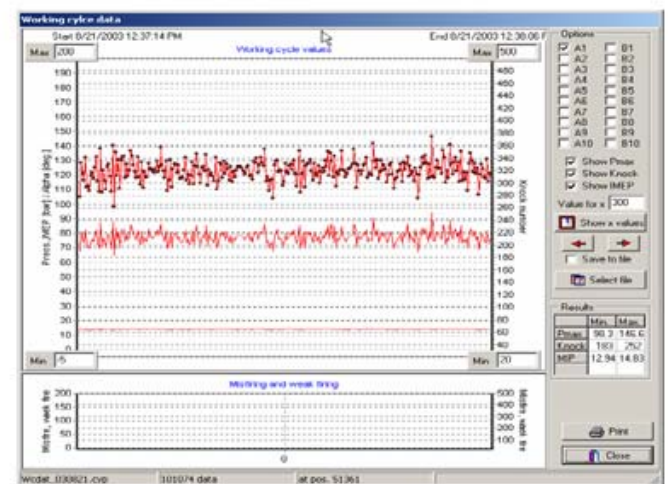

Other products include.....

CMS Cargo for movable application

CMS Combustion Monitoring System for Gas Engines

Application: Fixed installation
