VIGIL ENGINEERING – for SHIP REPAIRING

SHIP REPAIRING is one of the major activity undertaken by VIGIL - under the name of Vigil Engineering (VE). VE has established its name in the market owing to its professional services together with “timely completion of projects”. VE is a full fledged workshop located in Sharjah with well equipped area of 40000 sq ft to take up bigger jobs of Rigs, New Constructions & Conversion projects. VE also provides its well experienced manpower as “riding squad” together with necessary tools & tackles and equipment!

Being on the list of approved subcontractors of Drydocks World, Dubai and other major oilfield related yards, VE is in full compliance at all times by keeping Quality and Safety on the forefront – a fact verified by numerous positive feedbacks from its valued customers.

VE manpower is well experienced and qualified to carry out repairing/overhauling jobs onboard various types of vessels like Tankers, OSVs, Chemical Tankers, Cargo Ships, Bulk Carriers, Barges etc... Range of jobs carried out covers following :

- STEEL RENEWALS / PIPE RENEWALS,
- OVERHAULING OF VALVES, DECK MACHINERY, SMALL ENGINES ETC..
- HYDRAULIC / CRANE REPAIRS
- NEW STEEL FABRICATION AS PER SAMPLES AND / OR DRAWINGS,
- MACHINING JOBS,
- INSTALLATION JOBS (LIKE MGO COOLERS)
- ANY OTHER MISCELLENEOUS JOBS.

INDUSTRIAL FABRICATION - MOULDS FOR CONCRETE BLOCKS

Over the years VIGIL has also developed a specialized line in Fabrication of Moulds for Concrete Blocks., offering real value for money. We use special wear resistant steel plates specially imported from Sweden to ensure the highest quality. This has earned VE a very special name among the block makers not only within UAE but also from surrounding countries.

THE MAKERS OF MACHINES FOR WHICH WE HAVE MADE MOULDS ARE ZENITH, SACME, FINLAY, HESS (EGG LAYER TYPE), HENKE, MASA

VARIOUS TYPES & SIZES OF MOULDS FABRICATED BY US COMPRISE OF HOLLOW BLOCKS, SOLID BLOCKS, THERMAL BLOCKS & HORDI BLOCKS.
